

ABSTRACT**FILM-FORMING COMPOSITIONS FOR PROTECTING SKIN FROM BODY FLUIDS
AND ARTICLES MADE THEREFROM****Thomas James Klofta****James Anthony Staudigel****George Endel Deckner**

The present invention relates to a film-forming barrier composition useful for protecting the skin from body fluids, such as urine, feces, menses. The composition comprises a skin conditioning agent, a viscosity enhancing agent and an oleophilic film-forming agent. Optionally, the lotion may comprise skin care ingredients for treating or maintaining skin health. The composition may be applied to the skin by suitable delivery vehicles, such as absorbent articles or components thereof, sheet materials, pads, bandages, sponges, foam pads, pumps, sprays, depending on the viscosity of the composition.
